Executive Summary:

Primary Education Development Program is aimed at supporting basic education to school aged children of Bangladesh to set a strong foundation for their better future. As a follow up of Third Primary Education Development Program, the Fourth Primary Education Development Program (PEDP4), a sub-sector wide program of the entire primary education sector has been started its activities since July, 2018 for five years. The Ministry of Primary and Mass Education (MOPME) is responsible for executing the program. The Directorate of Primary Education (DPE) acts as the implementing agency. The Local Government Engineering Department (LGED) and the Department of Public Health Engineering (DPHE) are the partners and implementing agencies for need-based infrastructure development and major maintenance works. The PEDP4 has emphasized appropriate infrastructure development and maintenance to provide child friendly environment that would contribute towards achieving the quality and equity education. The Social Management Framework (SMF) has been adopted in PEDP4 to address any anticipated social safeguard issues related to land use, land acquisition and other impacts that may arise during the implementation period of the program. The purpose of Semi-annual Social Safeguard Management Report (SSSMR) is to present the status of safeguard measures taken to mitigate the social impacts that may arise due to construction of sub-projects under PEDP4.

Table-1: Cumulative status of Sub-projects screened

Sl. No.	Type of Sub-project	No. of Sub-projects (Jan. - June., 2023)	Cumulative No. of Sub-projects (July,2018-June, 2023)	Land status	EMP cost incorporated/ omitted in BoQ	Work Status/ % of completion
1	Additional room construction of School	968	9008	School acquired land	EMP cost is incorporated in BoQ	Tendering and different stages of construction
2	Expansion and construction of DD Office	--	01	DPE acquired land	EMP cost is incorporated in BoQ	Do
3	Expansion and construction of DPEO Office	03	16	DPE acquired land	EMP cost is incorporated in BoQ	Do
4	Expansion of PTI	20	37	PTI acquired land	EMP cost is incorporated in	Do

					BoQ	
5	Teachers' rooms	3157	3157	School acquired land	EMP cost is incorporated in BoQ	Do
6	URC (Upazila Resources Center)	13	13	DPE acquired land	EMP cost is incorporated in BoQ	Do
	Total	4161	12232			

The table presented above demonstrates the status of sub-projects screened of semi-annual social safeguard management report. It can be seen that a total 4161 sub-projects were taken for construction and expansion of additional rooms of school including others institutional infrastructures such as URC, PTI, DD and DPEO offices during the reporting period (Jan.-June, 2023). This Semi-annual Social Safeguard Management Report (SSSMR) is prepared based on cumulative 12232 sub-projects consisting of 9008 (73.64 %) schools and 3224 (26.36 %) other institutional infrastructures screened during (July 2018-June, 2023). It is noted that most of the sub-projects were at tendering and different stages of construction. Social screening was conducted to identify the existing social risks related to land acquisition, resettlement and other social impacts. After careful scrutiny the screening results presented above, it can be observed that all the 12232 sub-projects are within the existing campus and no land acquisition were required for construction and expansion of sub-projects. Therefore, no cases of resettlement or migration of people were also reported. In addition to the infrastructures, other incentive schemes such as scholarships, free textbooks, development and training on mother languages books for SEC/IP students are also going on in full swing.

Furthermore, in few cases the residential facilities in remote locations to increase the participation of students from IP communities and other disadvantaged communities are provided. Furthermore, special arrangement has been taken to appoint teachers from SEC/IP group in those areas where SEC/IP are dominated. Additionally, many positive social impacts are being generated due to sub-projects implementation. A substantial number of employments were generated during the construction phases and a good number employment will be generated during the operation phases of the sub-projects. The local people are getting opportunities in construction activities that generate employment generations. The sub-projects are fulfilling the demand of additional rooms of schools for teachers and students.

1. Introduction

1.1 Background

The Primary Education Development Program is aimed at supporting basic education to school going children of Bangladesh to set a strong foundation for their better future. The Fourth Primary Education Development Program (PEDP4), a sub-sector wide program of the entire primary education has been started its activities since July, 2018 for five years. PEDP4 is basically a program of fourth in a row, and as a follow up of PEDP-3. The Fourth Primary Education Development Program (PEDP4) is supported by the Government of Bangladesh and five Development Partners (DPs) such as ADB, WB, JICA, EU & UNICEF. Overall objective of the PEDP4 is to provide quality primary education for all children of the country from pre-primary up to grade 5 through an efficient, inclusive and equitable education system. The Ministry of Primary and Mass Education (MOPME) is responsible for executing the program and the Directorate of Primary Education (DPE) is the implementing agency. The Local Government Engineering Department (LGED) and the Department of Public Health Engineering (DPHE) is the partner implementing agency for need-based infrastructure development and major maintenance. The PEDP4 emphasizes appropriate infrastructure development to provide child friendly environment which would contribute towards achieving quality equitable education in the country.

2. The Social Management Framework (SMF)

The Social Management Framework (SMF) has been adopted to address any anticipated social safeguard issues related to land use and impacts that may arise during implementation of the project. The purpose of SMF is to identify ahead the social development concerns that the project could address within its scope of works. This SMF is intended to provide general policies, guidelines, and procedures for integration of required mitigation measures of possible safeguard impacts into the selection, design and implementation of any program development interventions. Because of its interventions in areas inhabited by the Small Ethnic Communities (SECs), especially the Chittagong Hill Tracts (CHT), PEDP4 followed the ADB's Safeguard Policy Statement 3 (SPS) and World Bank's Operational Policy on Indigenous Peoples (IP) (OP 4.10). These policies will also apply to PEDP 4 for the schools in these areas. On the other hand PEDP 3 has not triggered ADB's SPS 2 or WB's OP 4.12 on Involuntary Resettlement (IR), as all repairing works and additional classrooms have been constructed on existing school premises. PEDP4 however did not require any land (acquired or contributed). It is expected that local communities will continue to actively participate in PEDP4. Nevertheless, DPE has decided that IR should also be taken into account in PEDP4. The SMF, address the physical activities (hereinafter "subproject" is also used to mean a school that may involve any type of civil works) under

PEDP4 that may give rise to social safeguard issues and impacts, safeguard screening requirements, grievance redress procedure, implementation arrangement, etc., which will be used for both SPS 2 and 3 of ADB and OP 4.10, OP 4.12 of WB. In addition of that the SMF provides the general guidelines and procedure for SECs Plan, and those for identifying and addressing the involuntary resettlement issues and impacts in the project areas.

2.1 SMF Objectives

The overall objectives of SMF are as follows to:

- (i) Enhance social outcomes of the activities implemented under the sub-projects;
- (ii) Identify and mitigates adverse impacts that the individual sub-projects might cause on people, which also include protection against loss of livelihood activities;
- (iii) Ensure compliance with the social safeguards policies of ADB, WB and other development partners on SECs and involuntary resettlement.

2.2. Social Safeguard Risks and Impacts

Social impacts and risks including land acquisition, resettlement and other social impacts are generally identified during the initial social screening of sub-project. Once social impacts are noted, then mitigation measures will be implemented. The social issues likely to be encountered during implementation of PEDP4 sub-projects are as follows:

2.2.1 Involuntary Resettlement:

It is noted that Involuntary Resettlement (IR) issue did not trigger for PEDP3, as all new civil works had been undertaken within the school premises, so far, and did not cause any displacement or adverse impact on livelihoods. Similarly, it is likely that there will be no involuntary resettlement under the program (PEDP4) since infrastructure construction (civil works) will be of small-scale and within school premises. In a few exceptional cases, additional land may be required to extend school facilities beyond existing premises. In such cases, first priority will be given to use available government land, and in case of unavailability of government land, a negotiated settlement (voluntary donation of land or willing seller and willing buyer approach) will be adopted to manage the required land. The MoPME/DPE has confirmed that any school requiring involuntary land acquisition will be excluded from the program scope. As land management is confined to negotiated settlement, negotiated land acquisition must be aided by SPS (2009) guidance of ADB.

2.2.2 Small Ethnic Communities /Indigenous People

The program may trigger Indigenous peoples (IPs/SECs) safeguard requirements according to ADB's SPS (2009). However, the program is likely to have limited social impacts and risks by virtue of the limited construction of infrastructures within existing school premises. The project category is B for SEC/IP as positive impacts are expected on the SEC or IPs due to affirmative actions of the program. In addition to the infrastructures other incentive schemes are there such as scholarships, free textbooks, and residential facilities in remote locations to increase the participation of students from IP communities and other disadvantaged communities. Special arrangement is taken to appoint teachers from SEC/IP group in these areas. Separate IP/SEC plan is not prepared as the program is embedded with measures to ensure SEC/IP participation through bottom up planning for PEDP4.

2.3 Others Social Issues

2.3.1 Mainstreaming Gender and Inclusive Education:

Gender and Inclusive Education Action Plan for PEDP4 assured mainstreaming gender through inclusive education and adding other parameters in this sector. These include developing gender sensitive curriculum in primary level and make it available for all, appointment of quality teachers with special quota for females, enhancement of their quality irrespective of sex and facilitate all the teachers with equal treatment. Finally, develop gender and hygiene friendly infrastructures have been developed in the respected area.

2.3.2 Communications and Social Mobilization:

Communication and social mobilization efforts can play an important role in the effort to improve the quality and inclusiveness of education and to ensure that no child is left behind. These sub-components include study; workshop & seminar development of materials, printing and broadcasting; national events including Bangabandhu and Bangamata gold-cup football tournaments, inter school sports, inter PTI cultural competitions, etc.

2.3.3 Back to Education: An Intervention for Out Of School Children (OOSC):

In the later stage of PEDP3 this program has been initiated and encompassed in PEDP4 with an objective of enrolling all the children in the school, including who are left behind are in school on time and continuing their education in an equitable and inclusive setting that provide relevant and quality education. It is expected that by the end of 2023, the number of out of school children (8-14 years) in Bangladesh will be reduced by 50% from the baseline value. As a result one million OOSC will return to/enroll in formal school/education, complete the primary phase and achieve minimum learning outcomes

according to the national curriculum and assessment system. The target children are those who are in early aged but never enrolled, dropped out from lower grade and higher aged dropped out from higher grade.

2.3.4 Children with Special Education Needs (SEN):

This sub-result area aims to identify children with special education needs and enable them to have primary education in mainstream primary schools PEDP4. In order to create a more conducive and supportive school environment for children with SEN in mainstream schools, the modalities will cover, among other things, the early identification of special needs, specialized pedagogical techniques, creating an inclusive environment at school and in the classroom, and liaison with parents and specialized services. The program will also strengthen linkages between schools and specialized services for SEN.

2.3.5 Education in Emergencies and Disaster Risk Reduction in Education (EiE and DRR):

Under PEDP4 focus is given on Disaster Risk Reduction (DRR) and Education in Emergencies (EiE). The Bangladesh primary education system is one of the largest education systems in the world. It is expected that through this sub-component of PEDP4 this large number of student will get formal knowledge of disaster risk reduction and disaster management. In the long run country will have skilled manpower in the disaster management in disaster prone country. Beside this, in the vulnerable locations (Cyclone, tornado, flood, riverbank erosion, landslide, earthquake etc.) school infrastructures will be prepared considering the regional natural/ climatic hazards, introducing innovative disaster and climate resilient infrastructures in the project areas.

3. Small Ethnic Communities (SEC)

The program has been actively working in areas where SECs live including the Chittagong Hill Tracts (CHT) where they are largely prevalent. OP 4.10/SR3 is therefore triggered for the Program. There is a dedicated database for the program with disaggregated data for SECs and gender. Although DPE carries out regular consultation with local people and designs school related civil works in a participatory manner, sub-project level SEC Plans may require to be developed in terms of documentation and reporting, based on the level of impact on Indigenous Peoples (IPs). Awareness raising and community level consultations with SECs are carried out for implementation the sub- project in participatory manner.

3.1. Screening & Mitigation Guidelines

To the extent feasible, DPE (i) avoided subprojects that will require private land acquisition; (ii) carry out the extension/renovation works in the lands already owned by schools; (iii) use their own or other public lands for building new schools. Where adverse impacts could not be avoided completely, DPE screened all the subprojects to identify the potential

safeguards issues and impacts by using a specified instrument (Annex A) and, if required, prepared and implemented impact mitigation plans as per the guidelines provided in this SMF. Where screening results indicated potentials of adverse impacts, MoPME/DPE's action on a school was consistent with the following sets of guidelines.

- a) Framework for SECs Plan consistent with OP 4.10 and SR3, it provides principles and guidelines to identify and deal with adverse impacts on IPs, and a consultation framework for adoption of mitigation and development measures; and
- b) Guidelines for Land Use & Impact Mitigation consistent with the Bangladesh Land Acquisition Ordinance, 1982, WB OP 4.12, and SR2, it provides principles, policies and guidelines for use of public and private lands and adverse impact mitigation; mitigation measures and standards; mitigation plan requirements and preparation process; implementation and monitoring arrangements for mitigation plans.

4. Framework for Small Ethnic Communities Plan

4.1 Background

Bangladesh is rich in cultural diversity due to presence of different Small Ethnic Communities who are also known and addressed as the *Adivasis*/Tribal. They are diverse in their culture, language, religion, traditions and patterns of social, economic and cultural life. In the recent National Poverty Reduction Strategy Paper adopted by the Government of Bangladesh, the term "*adivasi*/ethnic minorities" was used. Tribal peoples, both from the CHT and the plains, increasingly refer to themselves as Small Ethnic Communities in English, and as *adivasis* in Bangla. The largest concentration is in the Chittagong Hill Tracts but other areas in which these communities live include Chittagong, greater Mymensingh, greater Rajshahi, greater Sylhet, Patuakhali and Barguna. Chakma, Garo, Manipuri, Marma, Munda, Oraon, Santal, Khasi, Kuki, Tripura, Mro, Hajong and Rakhain are some of the well-known *adivasi*/small ethnic communities of Bangladesh. In the census of 2011, Bangladesh government identifies 29 SECs of population 1,586,141. Different reports provide different numbers of tribal/ethnic minority population and it is estimated to be around 2-3 million. For the purposes of this document they have been referred to as Small Ethnic Communities (SEC).

SECs comprise about less than 1% (3 million) of the population of Bangladesh living mainly in the Chittagong Hill Tracts (CHT) and in rural communities in Mymensingh, Sylhet, Dinajpur and Rajshahi. The small ethnic communities in CHT possess separate identities, specific racial backgrounds, different languages, and distinct heritage and culture. The largest groups are the Chakmas, Marmas, and Tripuras. They differ in their social

organization, marriage customs, birth and death rites and rituals, food and other social customs from the people of the rest of the country. There is a lack of information on their socio-economic indicators. These communities largely speak Tibeto-Burman languages. The indigenous peoples everywhere are generally poorer than the mainstream peoples. Most indigenous peoples in CHT live in settlements in remote hills and valleys that are very difficult to access, they still use lands for living and livelihood under the traditional/customary tenure not recognized in the country's land administration system. These areas they inhabit, especially in CHT, are generally characterized by poor basic infrastructures like roads, schools, water supply and sanitation, health care facilities and markets. Applicability of OP 4.10 and ADB's Safeguard Requirement 3 (SR3) in the plains districts and CHT will in general depend on (i) the presence and prevalence of SECs in the close vicinities of the schools that are undertaken for expansion/improvements as well as location and sites of the new schools; and (ii) whether or not the required physical works would affect them in manners to threaten their cultural way of life and restrict access to their livelihood activities. Given their scope for individual schools and availability of khasland in CHT, it is assumed that the civil works are highly unlikely to cause impacts that would threaten SECs in any significant manner. Yet, in view of the uncertainty DPE has decided to formally adopt this framework outlining principles, policies, guidelines and procedures to identify the impact issues and potential risks and, if required, formulate and execute Small Ethnic Communities Plan. This will apply whenever physical works for existing and new schools in CHT or plains districts are found to cause adverse impacts on indigenous peoples in these regions.

4.2 Objectives of Small Ethnic Communities Plan

The objective of ADB and World Bank's SEC Safeguards policies is to design and implement projects in a way that fosters full respect for SECs identity, dignity, human rights, livelihood systems, and cultural uniqueness as defined by the Small Ethnic Communities themselves so that they (i) receive culturally appropriate social and economic benefits, (ii) do not suffer adverse impacts as a result of projects, and (iii) can participate actively in projects that affect them. Keeping consistency with the above safeguard requirements, the main objectives are to ensure that the program activities in general, and the physical works in particular, do not adversely affect Small Ethnic Communities, and that they receive culturally compatible social and economic benefits. This will require DPE to carefully select and screen all the schools and their locations and sites, that are to be expanded or built anew, and determine presence of Small Ethnic Communities in the school localities and ensure their participation in the civil works selection and implementation processes. Depending on prevalence of Small Ethnic Communities- and their needs and concerns – these will be assessed through consultations involving local communities.

4.3 Small Ethnic Communities Plan

Selection of expansion works and other improvements and location of new schools will largely indicate whether or not, or in the manner, indigenous peoples would be benefitted or adversely affected. Wherever affected adversely, in the plains or CHT, DPE will prepare and implement Small Ethnic Communities Plans (SECPs) in accordance with the principles, guidelines and procedure outlined below. To avoid or minimize adverse impacts and, at the same time, ensure culturally appropriate benefits, DPE will select, design and implement the physical works in adherence to the following principles:

- a. Fully include indigenous peoples communities in general and their organizations in the process leading to identification, planning and implementation of expansion/improvements works and locations and sites of new schools and dormitories for children and teachers;
- b. Carefully screen, together with indigenous peoples, the required physical works on existing schools and locations and sites of new ones for a preliminary understanding of the nature and magnitude of potential impacts, and explore alternatives to avoid or minimize any adverse impacts;
- c. Where alternatives are infeasible and adverse impacts are unavoidable, immediately make an assessment of the key impact issues jointly with indigenous peoples and others knowledgeable of indigenous people cultures and concerns;
- d. Undertake the tasks necessary to prepare IPPs with the most appropriate measures to mitigate the adverse impacts and, if opportunities are there, development measures for the general SECs; and
- e. Not undertake civil works where the SECs remain unconvinced about the benefits to offer broad support for the project activities

5.0. The Sub-projects:

5.1. Sub-project description:

In PEDP4, Need-based Infrastructure development has been incorporated as Program component named Access and Participation to improve the quality of physical learning and working environment through the construction of additional classrooms, teachers' rooms, head teachers' rooms and other infrastructures. The major interventions of PEDP4 are

construction of 40000 additional rooms for class & teachers and 10500 rooms for head teachers. Beside this, 8 Divisional Deputy Director(DD) office, 64 District Primary Education Office (DPEO), 365 Upazila Education Office (UEO)/ Thana Education Office(TEO), 285 Upazila Resource Centre (URC), 67 Primary Training Institute (PTI) and Dormitory buildings of National Academy for Primary Education(NAPE) are also planned for construction/expansion under PEDP4. Need based additional class rooms to be constructed to reduce overcrowding in a class. These are basically of two types, vertical extension and horizontal extension but in few cases there is combination of both. The architectural plan of the vertical extension is determined considering the existing plan of a building following PEDP4 Planning Guideline. In such cases, capacity assessments of the foundation of the existing building are assessed to find out the feasibility of a vertical extension. In case of horizontal extension, the placement of the new infrastructure is very important to maintain a good school environment considering land scarcity in a densely populated country like Bangladesh. It is noted that the schools are not only buildings but these are associated in many items such as a playground including playing devices which offer better learning opportunities. So it is highly recommended that the possibility of vertical extension should be explored at first so that land can be made available for playground. Only if that seems to be unfeasible, a horizontal extension can be considered to construct the buildings.

By way of DPHE is constructing the WASH blocks in the same school campus in many schools, coordination among the two agencies is extremely important. LGED is constructing school cum cyclone shelters in the cyclone prone areas and school cum flood shelters in the flood prone areas. In such cases, the ground floor of the school is kept open and the class rooms are being built at the 1st floor. The ground floors of such buildings are used for various community activities during the normal time. However, the adequate number of toilet and source of drinking water should be carefully designed so that these can meet the demand during the peak use. As most of such schools are located in the saline prone areas where drinking water is already a problem, use of rainwater harvesting should be considered in many such schools. In addition, a number of additional classroom of schools are also planned to construct in the Chittagong Hill Tracts region where special designs are being prepared considering the norms and culture of the local people, difficulties in carrying construction materials in some of the high and remoter locations and availability of suitable locally available construction materials wherever needed.

5.2. Scope of Semi-annual Social Safeguard Management Report (SSSMR):

In PEDP4, forty thousand additional rooms and ten thousand five hundred head teachers' rooms including others institutional infrastructures will be constructed under need based infrastructure sub- component.

It can be seen in Table: 1 that a total 4161 sub-projects were taken for construction and expansion of additional rooms of school including institutional infrastructures such as PTI, DD and DPEO office during the reporting period. This Semi-annual Social Safeguard Management Report (SSSMR-VIII) has been prepared based on cumulative 12232 sub-projects consisting 9008 schools and 3224 other institutional infrastructures.

6.0 Social Safeguard Screening of Sub-projects:

6.1. Methodology for assessing Social impacts:

The following methodology has been followed for assessing the social impacts of the sub-projects. The District & Upazila Offices of LGED were responsible for reviewing existing facilities to fill-up the Social screening format and preparation of social management plan (SMP) and its implementation. In particular, the Upazila Assistant Engineer/ Sub-Assistant Engineer carried out the social screening process or preparation sub-project specific SMP. The District Executive Engineer/Upazila Engineer reviewed the screening report and SMP through field visits. Additionally, District Executive Engineer/Upazila Engineer is also responsible for supervision and monitoring of social compliance / mitigation activities at district/upazila level during the construction phases.

In addition, engineers /officers posted at regional and divisional offices are monitoring the social mitigation or enhancement measures during construction phase. Furthermore, engineers /officers and Environmental Specialist of HQ PEIMU of PEDP4 are also responsible to monitor and supervise the social mitigation measures at field level. PEIMU already organized orientation courses at twenty regions of LGED for field level engineers and officers of LGED and DPE respectively on social safeguard issues of PEDP4. Moreover, an Environmental Specialist working at PEIMU is providing assistance in the field of capacity enhancement and monitoring processes, and also providing support in implementing the environmental and social safeguard frameworks of PEDP4.

6.2. Sub-projects screened:

A total 4161 sub-projects were screened for construction and expansion of additional rooms including other institutional infrastructures during the current

reporting period. The sub-projects include 9008 schools and 3224 institutional infrastructures such as URC, PTI, DD and DPEO offices etc.

6.2.1 School Sub-projects screened:

It can be seen in the table: 2, presented below a total 9008 schools (Cumulative) were screened for construction of 37963 additional rooms during the reporting period (July, 2018-June, 2023).

A) Type of School (Cumulative) based on construction :

Table-2: Type of School (Cumulative) based on construction

Sl. No.	School Type based on construction	No. of School (July, 2018-June, 2023) (No of Room)
1.	Vertical	1275 (5255)
2.	Horizontal	1822(5957)
3.	(Horizontal + Vertical)	5911 (26751)
	Total	9008 (37963)

Fig: 1 Type of School (Cumulative) based on school construction

Fig: 2 Type of School (Cumulative) based on classroom construction

B) Type of School (Cumulative) based on location:

The table presented below shows that 9008 schools having 7982 in plain , 232 in Hilly , 521 in Coastal belt , 69 in Haor and remaining 204 in Char area were screened at the end of the reporting period (July, 2018 –June,2023). Overall, the number of schools in plain area was 88.61 % of total schools screened.

Table-3 Type of School (Cumulative) based on location/topography

Sl.No.	School Type based on location	No. of School (July,2018 – June, 2023) No (School)
1	Normal (Plain)	7982
2	Hilly	232
3	Coastal	521
4	Char (River bed)	204
5	Haor	69
Total		9008

Fig-3: Type of School (Cumulative) based on geography:

6.2.2. Cumulative status of Sub-projects:

The table: 4, presented below shows a cumulative 12232 sub-projects were screened during the reporting period (July 2018-June, 2023) consisting of 9008 (73.64 %) schools and 3224 (26.36%) other institutional infrastructures. This Semi-annual Social Safeguard Management Report (SSSMR) is prepared based on cumulative 12232 sub-projects. It is noted that most of the sub-projects were at tendering stages and different stages of construction. Social screening was conducted to identify the existing social risks related to land acquisition, resettlement and other social impacts.

Table 4: Cumulative physical status of Sub-projects

Sl. No.	Type of Sub-project	No. of Sub-projects (Jan. - June., 2023)	Cumulative No. of Sub-projects (July,2018-June, 2023)	Land status	EMP cost incorporated/ omitted in BoQ	Work Status/ % of completion
1	Additional room construction of School	968	9008	School acquired land	EMP cost is incorporated in BoQ	Tendering and different stages of construction
2	Expansion and construction of DD Office	--	01	DPE acquired land	EMP cost is incorporated in BoQ	Do
3	Expansion and construction of DPEO Office	03	16	DPE acquired land	EMP cost is incorporated in BoQ	Do
4	Expansion of PTI	20	37	PTI acquired land	EMP cost is incorporated in BoQ	Do
5	Teachers' rooms	3157	3157	School acquired land	EMP cost is incorporated in BoQ	Do
6	URC (Upazila Resources Center)	13	13	DPE acquired land	EMP cost is incorporated in BoQ	Do
	Total	4161	12232			

Social screening was conducted to identify the prevailing social risks of 12232 sub-projects. It is noted that the usually social issues and risks related with implementation of the sub-projects are land acquisition; resettlement and other social impacts which have been identified during the initial social screening of sub-project. Once social impacts are noted, then mitigation measures are being implemented. Furthermore, the sub-projects under reporting are small and simple in

nature and to be constructed within the existing premises without any land acquisition. Therefore no issues of resettlement were reported in this period.

6.3. Assessment Social Safeguard Risks and Impacts:

The table: 5, presented below shows a cumulative 12232 sub-projects were screened during the reporting period (July 2018-June, 2023) which consists of 9008 schools, 01 DD offices, 16 DPEO offices, 13 URC and 37 PTI respectively. It can be noted that sub-projects were at tendering and different stages of construction.

Table 5: Cumulative physical status of Sub-projects

Sl.No.	Type of Sub-project	No. of Sub-projects (Jan. - June., 2023)	Cumulative No. of Sub-projects (July,2018-June, 2023)	Land status	EMP cost incorporated/ omitted in BoQ	Work Status/ % of completion
1	Additional room construction of School	968	9008	School acquired land	EMP cost is incorporated in BoQ	Tendering and different stages of construction
2	Expansion and construction of DD Office	--	01	DPE acquired land	EMP cost is incorporated in BoQ	Do
3	Expansion and construction of DPEO Office	03	16	DPE acquired land	EMP cost is incorporated in BoQ	Do
4	Expansion of PTI	20	37	PTI acquired land	EMP cost is incorporated in BoQ	Do
5	Teachers' rooms	3157	3157	School acquired land	EMP cost is incorporated in BoQ	Do
6	URC (Upazila Resources Center)	13	13	DPE acquired land	EMP cost is incorporated in BoQ	Do
	Total	4161	12232			

The table presented above indicates that the sub-projects under reporting are small and simple in nature and are being constructed within the existing premises without any land acquisition. Therefore no issues of resettlement were reported. Finally, it can be concluded that the Involuntary Resettlement (IR) was not an issue of concerned in the PEDP4.

6.4 Social Safeguard for PEDP4 Ethnic Community distribution

Table:6 Status of School for Mainstream and Ethnicity People in Bangladesh

Region	Total Schools	Distribution of School on the basis of SEC	
		All of Majority Mainstream Population	Majority Small Ethnic Community Population
BARISHAL	463	450	13
BOGURA	261	237	24
CHATTOGRAM	270	231	39
CUMILLA	496	474	22
DHAKA	572	551	21
DINAJPUR	497	469	28
FARIDPUR	343	326	17
JASHORE	412	400	12
KHULNA	439	418	21
KUSHTIA	253	246	7
MADARIPUR	275	269	6
MYMENSINGH	728	693	35
NARAYANGONJ	435	427	8

RANGAMATI	562	148	414
RANGPUR	801	773	28
SYLHET	660	640	20
TOTAL	9008	8235	773

A bar chart of schools on the basis of ethnic community population in school catchment areas are shown in fig-4

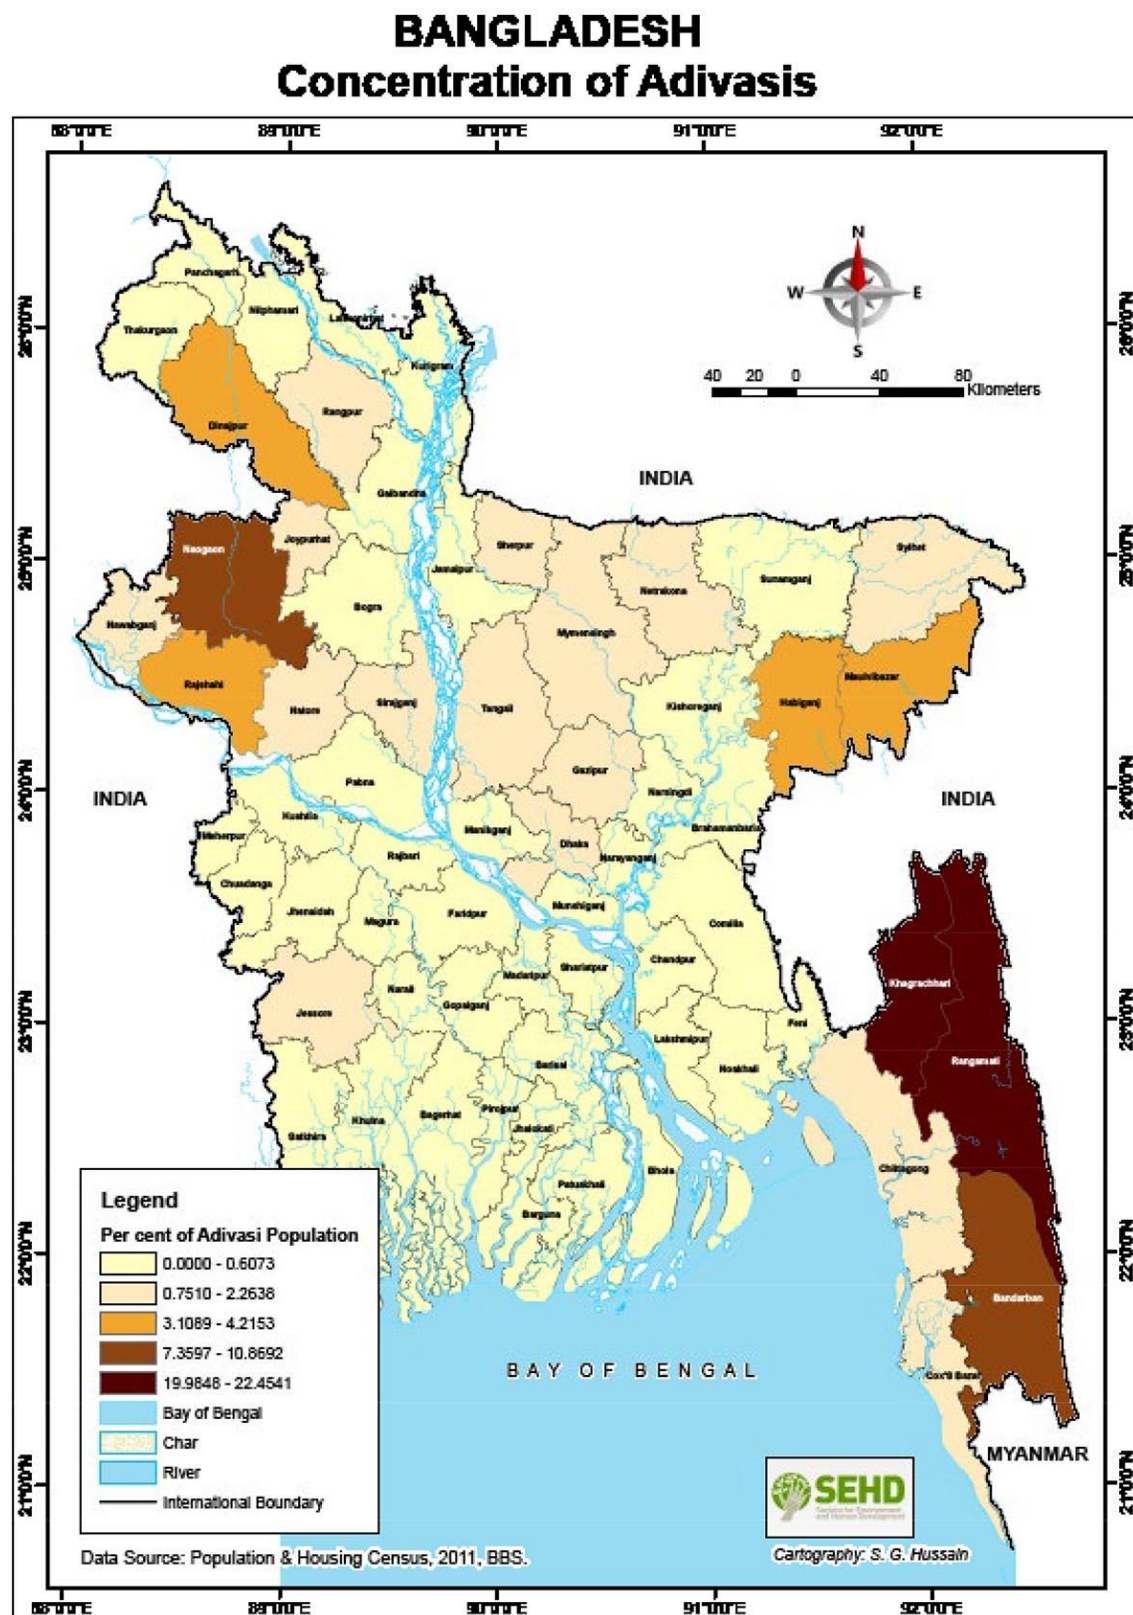

Figure 5: Density of ethnic people in Bangladesh

7. Safeguard measures considered under PEDP4:

In PEDP4 a provision has been taken to develop a school master plan. In preparing the school master plan, MoPME has been approved and issued an Infrastructure Plan and Planning Guideline. Currently, in PEDP4 master plans are being prepared following the Infrastructure Plan and Planning Guideline for every schools taken for development. The preparation of master plan at school level is being done through a consultative process involving the local community participation and discussion. It can be noted the master plan for school is being prepared by a committee consisting of UNO, UEO, AUEO, UE, SMC, AE of DPHE and local community & elites. In addition of that it can be noted that no major negative impacts on the environment due to civil construction under the program is envisaged. In the case of Chittagong Hill Tracts, given the remote and inaccessible locations of many areas where carrying costs of construction materials could be comparatively high, there the priority has been given on the use of locally available construction materials. Additionally, importance has been given for the preservation of surrounding ecosystems around the school building which means there should not be any hill cutting and destruction of ecosystem for civil works. Planting of exotic/alien invasive species (e.g. teak) of trees is avoided rather indigenous tree species are being planted to conserve the native biodiversity and maintain ecosystem. Special school types designed under PEDP-3 were developed for the areas incorporating the views of the local people's representatives in exchange meetings. The types of schools design were selected with their agreement.

In addition to the infrastructures, other incentive schemes such as scholarships, free textbooks, and residential facilities in remote locations to increase the participation of students from IP communities and other disadvantaged communities are in place. Special arrangement is taken to appoint teachers from SEC/IP group in those areas. PEDP4 considered the application of safeguard requirement in the plains districts and Chittagong Hill Tracts depending on (i) the presence and prevalence of SECs in close vicinities of the schools that are undertaken for expansion as well as location and sites of the new schools; and (ii) whether or not the required physical works would affect them in manners to threaten their cultural way of life and restrict access to their livelihood activities. Given their scope for individual schools and availability of khas land in CHT, it is assumed that the civil works are highly unlikely to cause impacts that would threaten SECs in any significant manner. In PEDP4, following safeguard measures were taken during the building constructions considering local weather, condition and environment:

7.1 Hill friendly school design

Hill friendly school buildings designs are developed for Chittagong Hill Tracts under PEDP4. LGED initially developed the design of three types of hill-friendly school buildings. In the design for remote areas priority was given to the use of locally available construction materials (e.g. Bamboo, wood and CI sheet) since carrying costs of construction materials could be comparatively high. For the preservation of the surrounding ecosystems around the school building no hill cutting and destruction of ecosystem were reported for civil works.

7.2 Grievance Redress Mechanism

DPE will establish a procedure to answer queries related to PEDP4 and schools undertaken for improvements and new construction; address complaints and grievances about any irregularities in application of the SMF guidelines for impact assessment and mitigation; and other personal/community concerns. Land-related complaints may range from disputes over ownership and inheritance of the acquired lands to affected non-land assets; donations under threats; etc. Based on consensus, the procedure will help to resolve issues/conflicts amicably and quickly saving the complainants resorting to expensive, time-consuming legal actions.

A Grievance Redress Committee (GRC) is constituted by DPE at the Upazila level, with memberships to ensure impartial hearings and transparent decisions. Membership of GRCs in Chittagong Hill Tracts upazilas and others heavily populated by SECs are taken into account any traditional conflict resolutions arrangements that are in practice in these regions.

7.3 Indigenous Peoples Safeguard

The IP safeguard policies of World Bank and ADB is to design and implement projects in a way that fosters full respect for Indigenous Peoples' identity, dignity, human rights livelihood systems, and cultural uniqueness as defined by the Indigenous Peoples themselves so that they (i) receive culturally appropriate social and economic benefits, (ii) do not suffer adverse impacts as a result of projects, and (iii) can participate actively in projects that affect them. Keeping consistency with the above safeguard requirements, the main objectives are to ensure that the program activities in general, and the physical works in particular, do not adversely affect Small Ethnic Communities, and that they receive culturally compatible social and economic benefits. This required DPE to carefully select and screen all schools and their locations and sites, that are to be expanded or built anew, and determine presence of Small Ethnic Communities in the school localities and ensured their participation in the civil works selection and implementation processes. Depending on prevalence of Small Ethnic Communities and their needs and concerns which was assessed through consultations-DPE worked with the following guidelines:

- i. Planned and designed civil works for existing schools and selected location and sites of new schools to avoid or minimize, to the extent feasible, adverse impacts on indigenous peoples.
- ii. Where adverse impacts on indigenous people are unavoidable, adopted and implemented socially and culturally appropriate measures to mitigate them.
- iii. To the extent feasible, DPE will try to avoid subprojects that will require private land acquisition in IP locality;
- iv. Where adverse impacts could not be avoided completely, DPE screened all subprojects to identify the potential safeguards issues and impacts by using a specified instrument (Annex A) and, if required, prepared and implemented impact mitigation plans as per the guidelines provided in the SMF.

7.4 Gender Inclusive Development

Women play an important role in any development activities. In the rural and poor area involvement of women in any income generating works eradicate poverty and reduce vulnerability. 30% women workers will be involve in all activities related to construction of school and others infrastructural works under PEDP4.

8. Conclusion:

It is noted that most of the sub-projects under reporting are small and simple in nature and are being constructed within the existing premises without any land acquisition. Therefore no issues of resettlement were reported. Furthermore, the area where SEC/IP area is dominant, community is being consulted properly to avoid possible social impacts (land ownership, Involuntary Resettlement, livelihood etc.) as well as mitigation, enhancement and better social management plan following the social safeguard framework of PEDP4. It can mention that LGED issued several instructions to district Executive Engineer and Upazila Engineer for ensuring the implementation of EMF & SSMF so that environmental safeguard issues and social safeguard issues are being addressed in implementing the sub-projects properly. In addition to the infrastructures, other incentive schemes such as scholarships, free textbooks, development and training on mother languages books for SEC/IP students and residential facilities in remote locations to increase the participation of students from IP communities and other disadvantaged communities are ongoing. Moreover, special arrangement has been taken to appoint teachers from SEC/IP group in those areas.

Moreover, many positive social impacts are being generated due to sub-projects implementation. A substantial number of employments were generated during the

construction phase and a good number of employments will be generated during the operation phase of sub-projects. The local people are getting opportunities in construction activities resulting employment generation. The sub-projects are fulfilling the demand of additional rooms of schools/ institutions. Time bound Corrective Action Plan (CAP) provided by ADB has been executed properly in PEDP4.

9. Recommendation:

The following time bound corrective measures are accomplished which was given in the previous report (July-Dec., 2022) are completed in this reporting period (Jan.-June, 2023).

Time bound Corrective Action Plan (CAP):

Sl. no.	Issue	Recommended action	Monitoring method	Time to achieve	Completion status
1.	Dust Control	Water to be sprinkled as and when necessary	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
2.	Air Pollution	Machineries will be set up in bland spaces and water to be sprinkled as and when necessary	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
3.	Water Pollution	Contractor will supply pure water and flood water will be drained out	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
4.	Hygiene and proper sanitation	Contractor will employ labor for maintaining hygiene and proper sanitation	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
5.	Toilet	Male and female toilet to be separated	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved

Sl. no.	Issue	Recommended action	Monitoring method	Time to achieve	Completion status
6.	Noise Pollution	Change of working procedure and timing	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
7.	Drinking water	Contractor will ensure supply of pure drinking water	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
8.	Health safety	First Aid Box would be placed in the working places	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
9.	Personal protection equipment	Contractor will supply personal protection equipment	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
10	Plantation	Plantation will be done where necessary.	Contractor implemented the task. Upazila Engineer along with his technical staff and SMC supervised.	Jan.- June, 2023	Achieved
11	Low land area	Low land area will be covered by collecting soil from uncultivated area	Contractor implemented the task. LGED Upazila Engineer along with his technical staff and SMC supervised and checked during inspection.	Jan.- June, 2023	Achieved
12	Char area	Char designed school building will be set up in Char area	LGED mainly Upazila Engineer and SMC implemented the task.	Jan.- June, 2023	Achieved
13	Hilly area	School building	LGED mainly Upazila		Achieved

Sl. no.	Issue	Recommended action	Monitoring method	Time to achieve	Completion status
		will be set up considering local materials	Engineer and SMC implemented the task.	Jan.- June, 2023	
14	Waste Management	Garbage would be collected and put in garbage bin	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
15	Child labor	Child labor will not be employed	Contractor implemented the task. Upazila Engineer along with his technical staff and SMC supervised, checked and reported accordingly.	Jan.- June, 2023	Achieved
16	Covid/ pandemic situation	Hand sanitizer, face mask, maintaining distance will be retained in working hour	Contractor implemented the task. Upazila Engineer along with his technical staff and SMC supervised, checked and reported accordingly.	Jan.- June, 2023	Achieved
17	Temperature Screening of construction supervisor and workers	Thermometer to be kept at work site for screening the temperature of construction supervisor and workers	Contractor implemented the task. LGED mainly Upazila Engineer including his technical staff supervised and checked during inspection.	Jan.- June, 2023	Achieved
18	Raise Covid-19 related awareness	Awareness of work supervisor and workers will be raised.	Contractor and LGED mainly Upazila Engineer including his technical staff provided awareness and motivation to work supervisor and workers.	Jan.- June, 2023	Achieved
19	Reduce work-related	Work related travel to be reduced based	Reduced based on work load.	Jan.- June,	Achieved

Sl. no.	Issue	Recommended action	Monitoring method	Time to achieve	Completion status
	Travels.	work load.		2023
